

Topic: Advanced software development techniques

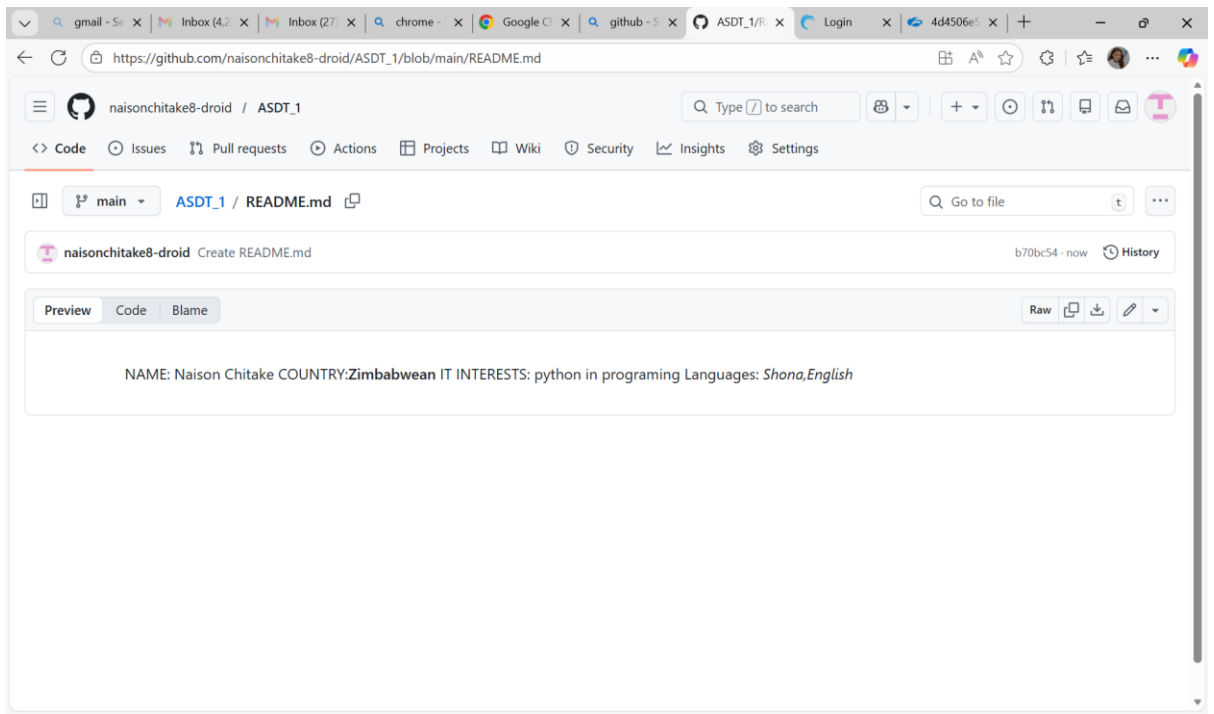

Name: Naison Chitake 78733

Exercises: No1 GitHub

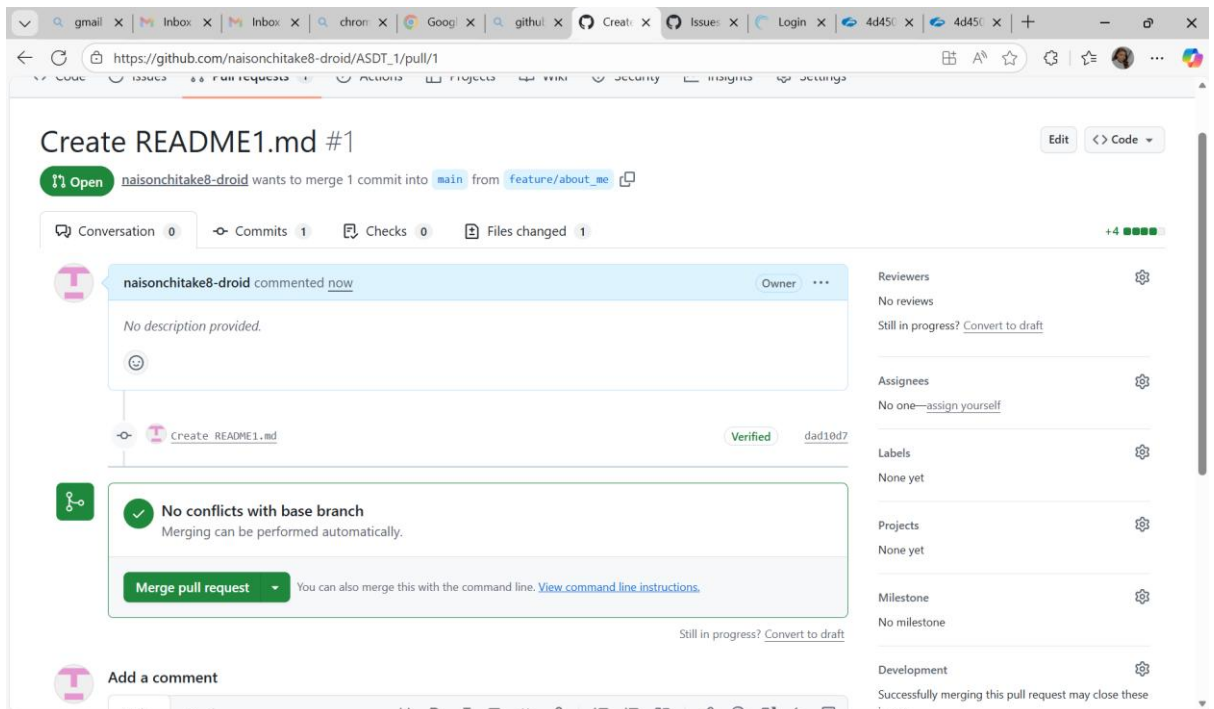

1. 1. Create a GitHub account.

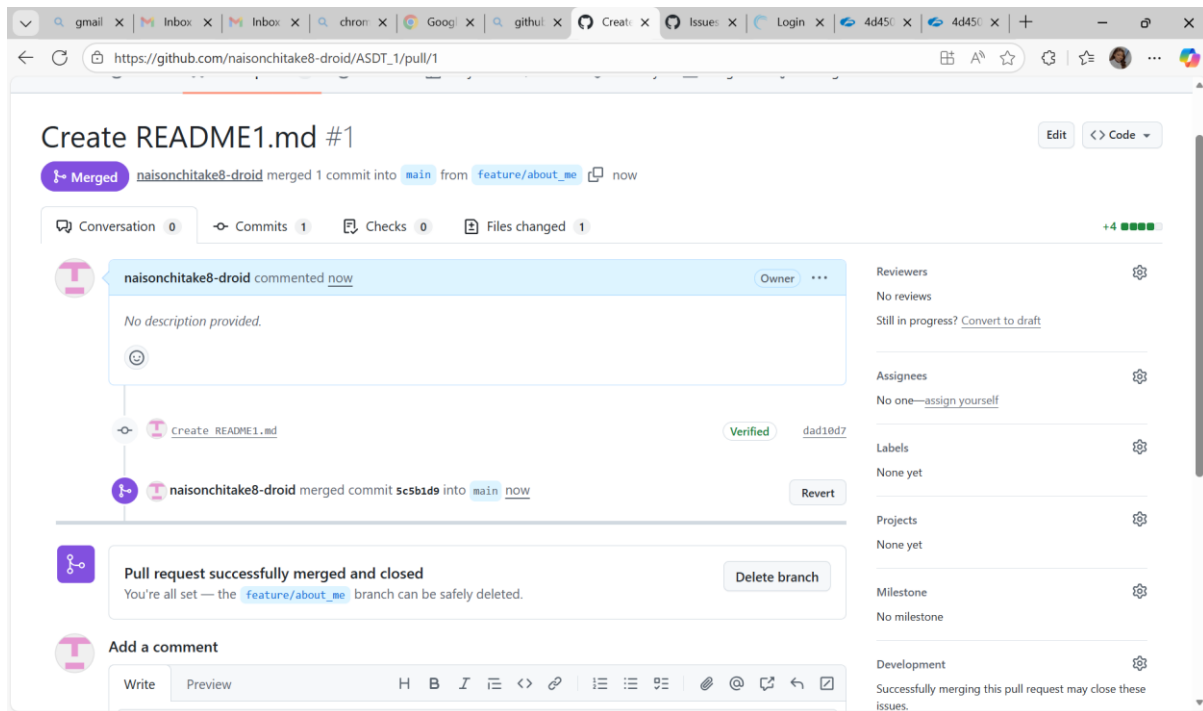

2. Create a private repository called **ASDT_1**.
3. Create a new branch in the repository called feature/about_me.
4. Add to the branch a new file called README.md.
5. Add to the file README.md some information about yourself (name, country of origin, IT interests, preferred programming languages, etc.). Try to use formatting features - <https://docs.github.com/en/get-started/writing-on-github/getting-started-with-writing-and-formatting-on-github/basic-writing-and-formatting-syntax>

6. Create a pull request for the **main** branch.
7. Review and merge a pull request.
8. *Add to the repository and to the Tasks in MS Teams a file **REPORT.pdf** confirming the completion of all steps of the exercise with notes and screenshots.*
9. Invite me to the repository (username **MansSlowiczek**).

10. Download and install Git (Windows, Linux, macOS)

11. In command line/terminal run `git --version`

12. Set up username.

13. In command line/terminal run
`git config --global user.name "Tolek Banan"`

14. Set up email address.

15. In command line/terminal run
`git config --global user.email "tolek@banan.local"`

16. Set up Git Credential Manager - <https://github.com/git-ecosystem/git-credential-manager>
